## COMMERCIAL WASHER WITH COIN OPERATION

*Few businesses or investment options can match potential return on investment that a coin laundry can produce. Virtually immune from downswings in the economy, it is a proven business model that requires minimal management. However, solid planning and smart choices in the equipment that you select will prove vital to the overall success of your business. The IPSO commercial laundry series ideally fits the bill for reliability, efficiency and ease-of-use and will get you off to best possible start.*

### RELIABILITY

IPSO's commercial laundry equipment is the perfect solution for small coin laundry applications or larger coin laundries that require a reliable machine for smaller loads. The CW8 washer has been developed with IPSO's long-life reliability, with stainless steel drum and outer tub, cast-alloy bearing housing and 4-point suspension system ensuring years of solid service from your machine.

As it's "freestanding" there is also no need to bolt the machine down during installation, resulting in an easier installation with less disruption to your laundry. We also offer an optional 300mm mounting-base for OH&S purposes.

So confident are we of your satisfaction with the performance and longevity of the IPSO commercial laundry range that we offer a 5-year parts and 1-year labour warranty for new purchases of IPSO commercial laundry equipment, as well as our "Total Care" rent/buy option, which offers you the following benefits:

- No capital outlay on your equipment - You pay the monthly fee only
- Off Balance Sheet expense - Tax benefits and no asset maintenance
- Does not impact your credit facility
- Predictable monthly expenses - All preventative and corrective maintenance, spare parts and travel costs covered
- Choice of replacement after five years, or total ownership by final payment at the conclusion of the five years
- 50% of rental payments credited should you decide to purchase outright within the first twelve months

### EFFICIENCY

The CW8 washer is highly efficient, reducing operating costs through low water usage, using as little as 56 litres per cycle, a saving of more than 40% compared to commercial top load washers.

A 300G/1000RPM spin speed increases overall laundry efficiency by removing more moisture from loads. Less moisture translates into reduced drying times. Fast cycle times get the job done quickly, while the large drum provides lots of room for larger loads.

### VERSATILITY AND EASE-OF-USE

Simple controls allow the CW8 washer to be operated with ease by users of all levels of expertise, with the washer also ideal for the following applications:

- Motels
- Caravan parks
- Backpacker accommodation and youth hostels
- Guest laundries

## CW8C

- Freestanding Front-Loader
- Coin mechanism programmable to receive \$2, \$1 or 20c coins
- Time efficient cycles (between 23-29 minutes)
- User-friendly control panel
- Inverter Drive reduces energy consumption
- Water efficient (56L per wash)
- High speed spin for drier laundry
- Mounting base available to comply with OH&S requirements

## CS8C

## CD8C

- Companion dryer to CW8
- Coin mechanism programmable to receive \$2, \$1 or 20c coins
- 4 drying programs
- Easily removable lint filter
- Steel cylinder
- User-friendly control panel
- Mounting base available to comply with OH&S requirements
- Gas or electric heating
- Freestanding soft mount: can be installed on any floor type
- Small footprint saves space
- Dual Coin mechanism programmable to receive \$2, \$1 or 20c coins
- 4 wash programs and 4 drying programs
- Inverter Drive reduces energy consumption
- Viewing window for both washer and dryer
- Gas or electric heating

## CD8C COMMERCIAL DRYER WITH COIN OPERATION

### RELIABILITY AND EFFICIENCY

The IPSO CD8 dryer features a large, easy-to-clean lint compartment and a reversible door to accommodate your laundry layout.

The large door opening, which can open to 180°, and the robust steel cylinder ensures many years of use.

The CD8 also utilises a noiseless exhaust blower ensures reduced energy costs, and drying times.

### VERSATILITY AND EASE-OF-USE

Like the CW8 washer, the CD8 dryer features a simple control panel to enable ease of use for all users, making it the ideal companion in terms of both style and function.

The CD8 dryer is also available with gas (Natural Gas or LPG) or electric heating, to ensure that no matter the configuration of your laundry, you can see the benefits of this machine first-hand.

## CS8C WASHER/DRYER COMBINATION WITH COIN OPERATION

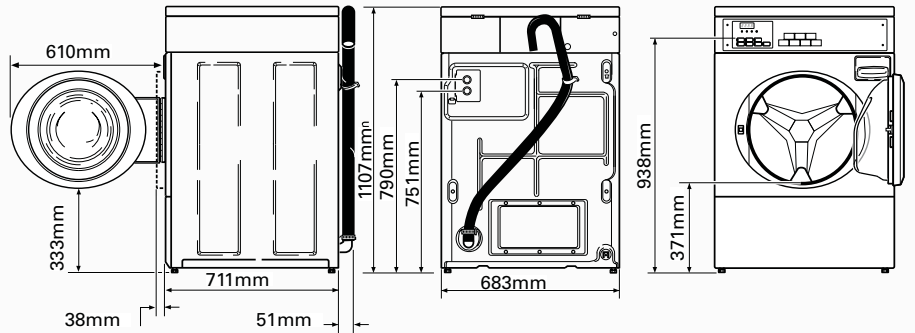

IPSO's CS8 washer/dryer combination combines the power and features of the CW8 and CD8, while occupying only half of the floor space of a conventional washer and dryer setup.

These stacked units also allow you to utilize the same connections and hook-ups required by a standard washer and dryer, so no changes to your installation are needed.
